

Spring Creek Oaks
Architectural Control Committee

Project Review / Approval Application

All property improvements which involve modifications to home and garage exteriors or for major yard renovations, such as pool additions and yard structures (timber playhouses, etc.), are required to be submitted to the SCO Architectural Control Committee for review and approval before any construction commences. The ACC review and approval / denial is based on an examination of the plans of the proposed improvements as to their compliance with the Deed Restrictions in the appropriate subdivision section. No site inspection is made during construction and the applicant is fully responsible for the correct placement of the improvements on the lot in observance of all required building setbacks and utility easements. The structural integrity and compliance with all applicable codes is the responsibility of the Applicant.
